

Perlite is a volcanic rock that is heated until it pops into light weight puffs. These are ground to a powder which has remarkable filtering ability. It is used in wine and beer making as a filter, and is now available as a pool filter media.

## Why Aquaperl is the clear choice for filtration in the aquatic market:

- Provides a sparkling pool day or night
- Removes dirt, harmful pathogens and microbes down to 2 microns
- Reduces your chlorine and shock usage.

Feature	Benefit
<ul style="list-style-type: none"><li>• Same dose rates as alternative filter aids.</li></ul>	<ul style="list-style-type: none"><li>• It's easy to change over to Perlite from other filter media such as Diatomaceous Earth.</li></ul>
<ul style="list-style-type: none"><li>• Doesn't stick and bind to filter grids.</li></ul>	<ul style="list-style-type: none"><li>• Simplifies the backwashing process.</li></ul>
<ul style="list-style-type: none"><li>• Longer filter runs.</li></ul>	<ul style="list-style-type: none"><li>• Fewer messy change overs.</li></ul>
<ul style="list-style-type: none"><li>• No clogging when used with Biguanides.</li></ul>	<ul style="list-style-type: none"><li>• Cleans up cloudy water more quickly.</li></ul>
